The Hindustan Petroleum Corporation (HPCL) commenced its first cow dung-to-compressed biogas project at Sanchore, in Rajasthan, under a waste-to-energy project.The plant will utilize **100 tons of dung per day** to produce biogas, which can be used as automotive fuel.

The plant will utilize **100 tons of dung per day** to produce biogas, which can be used as automotive fuel.

What are wastes to energy plants?

Waste-to-Energy (WtE) or Energy-from-Waste (EfW) is a form of energy recovery and the process of generating energy in the form of electricity and/or heat by the processing of waste into a fuel source.
