

India's inaugural training and certification program in underwater welding

Indian Institute of Technology (IIT) Guwahati, through its Technology Innovation Hub (TiH), in collaboration with the Indian Register of Shipping (IRS), has successfully conducted India's inaugural training and certification program in underwater welding and deep diving.

This pioneering initiative marks a notable milestone in enhancing India's capacity for underwater asset maintenance while developing a skilled workforce to support critical industries such as maritime, energy, and oil and gas.

With the increasing need for skilled professionals in underwater asset maintenance, IIT Guwahati and IRS are committed to shaping a workforce capable of meeting the challenges of the evolving maritime and energy sectors.
