

ORBIT SpaceTech Accelerator Programme

The **third cohort of the ORBIT SpaceTech Accelerator Programme**, launched by the **T-Hub incubator**, inducted **13 startups** working in advanced space-technology segments. The programme is designed to support innovation and entrepreneurship in India's growing space sector.

The startups focus on areas such as **satellite intelligence and propulsion systems**, highlighting the increasing role of private enterprises in developing advanced space technologies. The programme is managed by the **Atal Incubation Centre (AIC) T-Hub Foundation** in Hyderabad.
