Assam is set to enter the pharmaceutical manufacturing sector with the foundation stone of a ₹750-crore integrated industrial plant of Numaligarh Industries LLP, laid on 24 November 2026. The project marks a step towards diversifying the State’s industrial base and developing its chemical and pharmaceutical manufacturing capabilities.

In the first phase, the facility will produce formic acid, an antibacterial preservative. Subsequent expansion is planned to cover acetic acid, ethyl acetate, ethanol and paracetamol, among other products.
